EDUCATION

California Polytechnic State University

Computer Science (Fall 2023 - Winter 2027)

Space Systems Club - Air Breaks team using ROS2 ; Data Structures; Systems Programming; OOP & Design

SOFTWARE EXPERIENCE

Product Data Scraping Tool — 2022 - 2023

- Scrapes UPC, price, and other metadata in every in-stock variation
- Reduced an 8 hour task to 20 minutes
- Appends data to a spreadsheet and sends it to the client via email
- Scrapes across **multiple websites** such as Nike, Kohls, and Zoro by reading the source code to obtain info necessary within the URL
- **Increased throughput by 2300%** in product searching
- Built using **Python**, **BeautifulSoup**, Pywinauto, Openpyxl, and Selenium
- Currently creating a UI for web app user sign-in, web prompts to obtain information for desired scrape & more

Composite Image Script — 2023

- Wrote a **script to automate** the creation of a composite image following a specified format from a set of 2-4 individual images
- Script has been used to create **100+ composite images**, saving the company **thousands of dollars** on design spend while creating a **scaleable, automated process** for creating new composite images

SKILLS

Python	Proficient
BeautifulSoup	Proficient
Git	Proficient
Java	Proficient
Assembly	Novice
C	Novice
HTML / CSS	Novice
GCP	Novice

ACCOMPLISHMENTS

2x Finalist at County Math Competition

Alcatraz Swim (2022)

3x HS swim records

Nationally Ranked 3rd Fastest Swim for Age

ABOUT ME

I enjoy the essence of working "smarter not harder" if applicable, building tools that automate mundane tasks, particularly within the e-commerce space, in order to get ahead on other issues at hand. I have a strong work ethic, incredible communication, and an entrepreneurial mindset. Outside of academics, I enjoy surfing, swimming, and water polo.
